PeopleSoft Technical Developer (DC)

Profession ERP
Position Title PeopleSoft Technical Developer
Location DC - WASHINGTON DC - 1900 HALF STREET, SW (DCC014)
Telecommuting not allowed
US Citizenship Required: Yes
Duration > 12 months

Project Overview

Would you like to be part of a team focused on building, enhancing, and extending technology solutions that power HCM and Payroll processing around the world for thousands of Military members? Do you have the passion to gain deep knowledge of HR, Payroll and financial concepts, develop deep PeopleSoft experience across a variety of modules - PeopleSoft Profiles Management, Global Payroll, Absence Management, Recruiting Solutions and Webservice integrations in a complex and dynamic environment?

We are looking for someone well-rounded technically, familiar with PeopleSoft tools and technology, data structures and associated programming styles.

You will have the opportunity to work with the latest PeopleSoft technology as part of a team of dedicated software and data engineers, architects and database administrators.

What makes this role different from other PeopleSoft developer jobs is that you will be an integral partner within our HR and Payroll teams. This role is part developer, part designer and part functional expert. The ideal candidate will have at least one full lifecycle implementation using PeopleSoft 9.1. Success in this role will require the ability to adapt to a fast paced, dynamic and results oriented environment.

Daily Responsibilities

- Develop & deliver high quality software solutions using PeopleSoft HCM and Global Payroll 9.1 for HR, Recruiting, and Payroll business needs
- Deploy, support and maintain HR and Payroll systems for our client and their partners
- Push the limits of third-party software through innovative design and delivery

- Required: Travel 0 - 10%
- Required: Years of experience (min) 6-9
- Required: Degree Bachelors

Required: Basic Qualifications

- Strong interpersonal, written, and verbal communications skills
- 6+ years of PeopleSoft development experience (Application Designer, PeopleCode, Application Engine, XMLP, Integration Broker)
- Experience working with relational databases and strong SQL skills
- Ability to comfortably work in a fast paced, often ambiguous and event driven environment
- Bachelor's Degree in Computer Science, Engineering or related technical field
- Experience with PeopleSoft Recruiting solutions, Global Payroll or Payroll Interface implementation, configuration, support and reporting Desired: Skills
- Experience with Oracle and Unix
- Experience interfacing with third party using webservices
